ActivInspire

Face-to-face courses

ActivLearning offers educators courses in everything from getting started with ActivInspire, to getting results when training others in their school

Core Essentials, Part 1 course provides step-by-step basic hands-on instruction in the ActivInspire software. Build knowledge of the basic tools, explore the resources available, import Resource Packs, and discover online resources available to support implementation

Core Essentials, Part 2—step by step, hands on instruction will guide you to create interactive flipchart lessons through the use of layers, magic ink, connector tools, grids, and math tools

Beyond the Essentials—learn advanced skills such as adding multimedia, creating containers and restrictors, linking documents and web sites, and explore additional ways to integrate ActivInspire into existing curriculum

ActivInspire ActivInstructor workshops are designed to prepare advanced ActivInspire users to redeliver training in their school or district. This class includes hand-on practice in redelivery methods and discussion of Best Practices in Professional Development

ActivAdministrator workshop helps you to understand the interactive capabilities of the ActivClassroom—learn basic ActivInspire skills, explore Promethean resources, and engage in meaningful dialog with colleagues regarding Best Practices, teacher observations and evaluations

Effective Use of Learner Response Systems—learn how to use Promethean Learner Response Systems effectively in the classroom to help assess students and differentiate instruction. Questioning structure, pedagogy and higher order thinking skills are explored in this workshop

Curriculum Design—create flipcharts to enhance your school/district curriculum. Bring your curriculum materials and spend focused time with Authorized Promethean Trainers incorporating advanced flipchart techniques and creating resources to meet your students' and teachers' needs
